

DNR Fish Stocking Activity – September 2022

The DNR is back to scheduling the stocking of muskies every other year. 154 fish, approximately 11.8 inches in size were released into the water on 9/19/22. Tracey, the DNR worker told me that if all goes well, we should be getting 9,000 walleye fry in the beginning of October. I will keep you informed in the near future.

Good fishing,
Darrel Mack
